

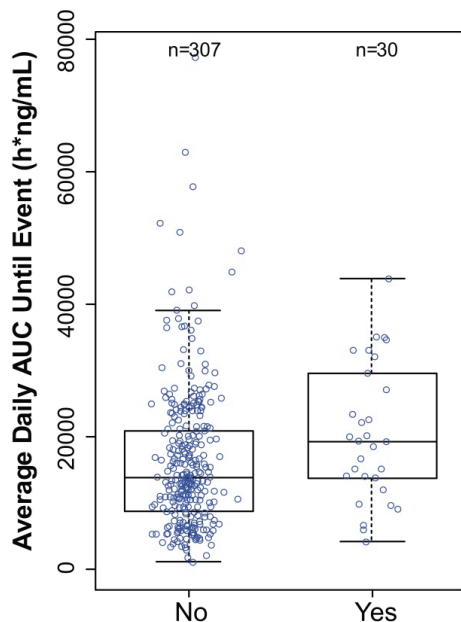

Figure S3. Time-averaged brigatinib exposure versus observed occurrence of grade ≥ 2 rash (a) and grade ≥ 2 amylase increase (b).

Individual patients are represented by open blue circles. The median exposure is represented by the horizontal line in the middle of each box. The top and bottom ends of the box plot represent the 25th and 75th percentiles. The bars extending from the ends of the box to the outermost data represent $1.5\times$ (the upper or lower interquartile range).

AUC, area under the concentration versus time curve.
